

Hi, I'm **JINA** your personal relocation assistant.

How can I help?

Answer some questions, and I'll provide real-time rankings of cities based on your lifestyle, community, and housing preferences.

Convenient

Access me anywhere there's WiFi. As an App*, I store everything in one place, simply log in, and all your searches and preferences are saved from wherever you left off.

Personalized

My RightScore algorithm weighs your priorities and assigns scores to listings, while allowing you to compare options side by side. Save properties you like or file them away as Not Interested.

Flexible

You can update your preferences at any time, and recommendations will change as your priorities do.

First, we'll find the city that best fits you.

Want someplace that's walkable? Need a good school district? How about bike trails?

I'll show you how cities rank when it comes to your lifestyle preferences.

After inputting housing options, my RightScore technology calculates the exact percentage of how well each option matches what you're looking for.

Now, let's get moving.

And if you're working with a SuiteAmerica Destination Services Consultant, you'll have access to their calendar and can schedule calls online at any time.

*Web App available 2020. Mobile App available 2021.
